Key Topics / Temas clave

- Approve agenda / *Aprobar agenda*
- Welcome Council Members / *Bienvenidos miembros del consejo*
 - Rosita introduces herself to the group and why she is a part of SSC.
 - Mr. G introduces himself and why he is a part of SSC.
- Nominate & Vote on Officers
- Discuss SSC Goals
 - Goal Ideas: Family engagement, communication,
 - Rosita liked the idea of being able to let families know where they fit into the communication.
 - Mr.G shared that I would like it if there is just acknowledgement of the communication. It could be a reply or even a like of the message. Letting parents know and feel comfortable with asking any questions that they have.
 - What do families need from the school and teachers?
 - Having a zoom time with the specific teachers. Having them at different times would be better because if parents have more than one student in a class they could not go. They want to have time to meet with and get to know the teachers. They want to be able to recognize the teachers and to support the teachers.
 - Office hours with the specific teachers or grade levels. Do not have the office hours at the same time.

- Ms. Juarez would like to have a technology workshop and be able to support the families with downloading apps and how to get emails. This would hopefully get more parents to participate because they will have that technology connection.
- Increasing the percentage of families on the apps.
- Carolina agrees with getting more families on the apps.
- Do we want this to be something that is on Zoom or in person?
- Have families be able to come back and come on specific days and only in grade level bands to keep it as small a possible.
- Next meeting we will continue to work on family engagement. Hopefully we can plan an event in the near future to bring families onto campus to get connected with the technology.
 - Anna will send an email to Ms. Juarez, Mr. G, and Rosita to plan next steps.

- Covid Response Update /
- Testing & Intervention Update /
- Data update:
 - Comparison of data between the last time we were in person to how they have started this school year.
 - More students moved into the yellow and green coming into the school year which is strong data coming out of the online part of the pandemic. This lets us know students were not as affected as many other students in the country. There is still work to be done.
 - For math we did not see as much of a positive look. But we did spend more time focusing on the reading portion because we know the importance of reading for students' futures. We will continue to focus on literacy, but in 5th and 6th grade more intervention has been put into place to help support students with their growth.
 - In elementary there is a drastic difference in where the students started and when they tested back in person. This was expected though and learning on zoom is not the best place to teach the elementary students. Does not mean anyone did anything wrong, it was just overall extremely hard. We know that the students can achieve similarly to how they did before.
 - Intervention groups have been set up in elementary to help build to continue to support the students.
